

Forest Lands Weekly Event Calendar Friday 26th March 2021

Akatarawa Forest

At Covid alert level 1, 4WD trips, concessions and permitted organised groups need to keep contact tracing calendars and details. This can be done by downloading the NZ government Covid tracer app and signing in by using the QR codes located at forest entrances and Orange Hut. One member of the group/trip needs to keep a record of attendance for that group/trip. These may need to be produced if the Covid virus appears locally. GWRC no longer need these to be sent in after a trip or event.

Hand hygiene should still be adhered to handling gates and locks. Sanitise hands before and after using gates and locks. If unwell stay home.

Active logging areas remain off limits to all recreation. Adhere to signage.

Current:

- Any incidents resulting in fire or potential for fire are to be reported immediately Call 111
 - Due to the closure of Campbell Mill Road, for logging operations on the neighbouring landowners property (3/4 of the way up), please take extra care on Perhams Road as there is likely to be more mountain bike, horse and walking traffic entering via this route.
 - Rock Garden closed to 4WD due to track subsidence
 - Steep slopes above Puketiro Road from the 14km to 17km markers have had some old harvesting wastes (root balls and dead spars) loosened by recent weather conditions. Please do not stop on this section of road and be vigilant while passing through, as there is potential for woody material to move down slope towards you.
-
- Caution is required when driving on all the forests roads. Hazards may include fallen trees, washouts debris and slips.
 - Speed Limit on Forest Roads 30km/h
 - Devils Staircase/Rock Garden route difficult terrain experienced trail/quad riders only
 - Extra care needed when using all ford crossing

Akatarawa Forest Block

- Greater Wellington Regional Council Rangers will be on Duty throughout the Forest.
- **Whakatikei wetland closed to all motorised recreation users.**

Updated notice of possum control using 1080 baits applied by helicopter.

There is a need for predator control within the Akatarawa Forest to protect our vulnerable ecosystems and the forest will be closed to all visitors while this operation is being undertaken.

The proposed aerial 1080 operation which has previously been notified has not commenced during the months of February-March as expected.

We are currently working with an interested party in relation to this planned activity and will be able to give you further updates once this process is concluded. However, we are hoping that the operation will proceed mid-Autumn to winter 2021.

During the operation non-toxic, tan coloured 'pre-feed' pellets will be applied, then 7-10 days later, green pellets containing the biodegradable pesticide, 1080 will be applied. The operation is also weather dependant, so further delays may occur due to rain or wind.

Once the operation has been undertaken visitors are requested to take extra care for up to six months or longer if necessary.

We will be providing notification when normal use of the Forest can resume, this will occur when 1080 baits have become non-toxic and possum carcasses have decomposed.

Tips for staying safe once the 1080 baits have been applied.

- Strictly supervise all children.
- Baits and carcasses are deadly to dogs - consider alternate areas for dog walking.
- Hunting is not permitted, feral animals may contain toxin and should not be eaten,

For further information please see www.gw.govt.nz/1080ops/

Metro Plantation Forestry Akatarawa

Fire Danger

There are to be no fires lit and no cigarette smoking within the exotic forest estate. Any fires need to be reported to the Forest360 forest manager immediately after calling 111
